Course Description:

This course is designed to teach you the basics of playing the keyboard and guitar, along with becoming familiar with the basics in music theory such as rhythm and note reading, recognizing tonalities, and also recognizing and reading chordal structures. We will begin the semester by learning some basic music theory so that we can begin exploring the keyboard and guitar with proper hand and fingering/hand position. On the keyboard, we will end the semester playing with both hands. On the guitar, you will be able to transition between at least 3 different chords. We will be practicing these skills using exercises as well as songs both as a class and individually.
